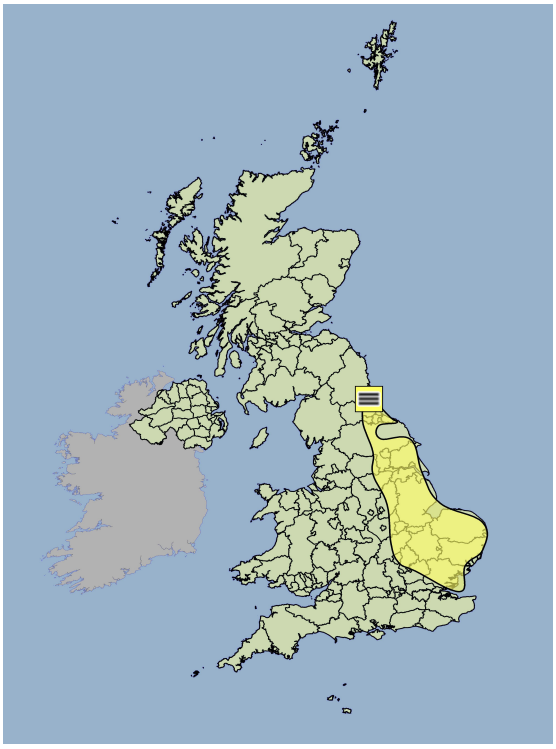
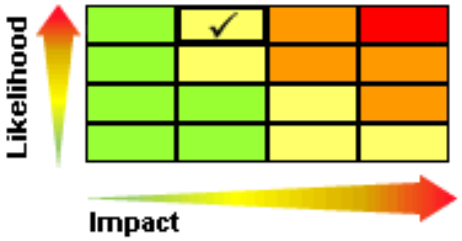
National Severe Weather Warning Service





Chief Forecasters Assessment
Clear skies, light winds and rapidly falling temperatures have allowed patches of fog and freezing fog to form. These are expected to become widespread overnight, but will start to clear southern counties around dawn as wind speeds start to increase. However, fog and freezing fog will be slower to clear in the north, for example Vale of York.

The Met Office have issued a **Yellow Warning** of **Fog**

Valid from **22:00 on Wed, 20th Jan 2016** until **10:00 on Thu, 21st Jan 2016**

Patches of fog and freezing fog will become more widespread overnight with visibility falling below 100 metres in places.

Be aware that this will cause difficult travel conditions, and some disruption to transport.
